

HIGHLAND SPRINGS: NATURALLY UPSCALE

The master-planned community of Highland Springs is nestled on the verdant Eastern Hillside of Chilliwack, allowing each of the large building lots expansive views across the Fraser Valley to the Coast Mountains.

The first two phases of Highland Springs offer 69 premium view lots and the first phase is selling quickly as buyers recognize the inherent long-term value of this naturally forested site.

This an opportunity to build your new house in a quiet, green and peaceful setting, while still close to all modern conveniences and commercial services.

Careful thought and planning provides privacy and unobstructed views for these estate-size properties, and eco-responsible design brings harmony with the natural landscape. Highland Springs is blessed with natural

beauty, mountain springs, flowing creeks and nearby golf and recreational amenities offering the best of all lifestyles. Residents can stroll wide green boulevards with meandering walkways, or sit on a bench to take in the lush and picturesque vistas.

A classic west coast contemporary building scheme and design guidelines by the Influent Group protects the character, quality and value of homes at Highland Springs. Only the most qualified and experienced builders are selected to build at Highland Springs.

"This is a place you'll want to call home, a natural place to be," noted sales manager Jason Laynes of Re/Max Nyda.

With prices from \$204,900 (plus tax), many buyers are already making Highlands Spring their home. Now is the time to select your view building lot.

Come visit Highland Springs this week at 7270 Ramsay Place, Chilliwack. For complete information, contact Jason Laynes at 604-991-8250, or Mark Andersen at 604-858-7179 or visit www.highlandsprings.ca.
